

THE LITTLE CHURCH THAT COULD

Many churches have begun using the GPS Life Journey to help their members discover and engage in God's purposes for their lives. Here is one example of how the GPS has impacted a community and the world from the service of a congregation of one small church of less than 100 adults:

- Four men help repair a local Christian school building
- A woman leads a regular prayer walk at local elementary school
- A couple ministers in Belize for three weeks in slum region
- A woman leads an on-going prayer group for local high school
- A woman serves as a regular volunteer with a community benevolence organization
- Several men serve as watch dogs for local elementary school
- A couple serves two weeks at an orphanage in Tanzania
- A woman adopts and weekly ministers to retirement home residents who have no family
- A woman goes to India to teach ESL for two months
- A man goes to Philippines to minister to the poor for 6 months
- A woman goes to Tajikistan for three weeks to minister to missionaries
- A man regularly tutors children after school
- A man does outreach project in Southern Russia
- A man raises funds on an on-going basis for a foster home in Kenya
- A woman trains for full-time ministry in India
- Two men mobilize funding for Bible distributions globally

As a result of their participation in the GPS Life Journey, scores of people of all ages have discovered and engaged in God's purposes for their lives. They now experience significance and those they serve are eternally grateful.

GOD USES ORDINARY PEOPLE

God really does use ordinary people to do His work here on earth. The disciples who Jesus chose were mostly fishermen. The man God chose through Samuel to be Israel's king was a shepherd boy. Even one of the greatest evangelists of our time, D.L. Moody, was a shoe salesman. Nearly every day in our work at Kingdom Mobilization we see this pattern repeated over and over again. Ordinary people discover and engage in God's purposes for their lives and do extraordinary things.

Kingdom Mobilization's momentum continues to build as we are experiencing the greatest year of growth in our history. We want to thank you for your commitment to helping people discover and fulfill their God-given purposes in life. He is blessing the expansion of our mission! Please take time to thank God for what He is orchestrating. Pray for God's provision for finances, energy, and spiritual capacity to keep pace with what He is doing.

Since 2003 (when Kingdom Mobilization was founded) the funds we have received and generated have produced 12 times their value in Kingdom impact. That is what we are all about - mobilizing people and leveraging resources for the Kingdom of God. While our needs are great, it is God who directs the resources. If God leads you to give to this ministry, then give as He directs. Whatever the outcome, our friendship will be the same.

Again, we thank **YOU** for your God-given role in helping mobilize individuals for significant service in God's Kingdom.

Your partners in mission,
Nolen Rollins - Founder and President

George P. Gundlach - Managing Director

KINGDOM MOBILIZATION IMPACT 2015

Our Momentum Continues to Increase

We Continue to Expand in the United States and Throughout the World

In the United States we have mobilization movements in Florida, Georgia, Texas, Arkansas, Colorado, North Carolina and Minnesota. We have conducted GPS Blitzes in numerous cities and have participated in events to broaden our audience.

God continues to open doors for GPS expansion globally. Within the next half year we will have GPS movements in Canada, Nigeria, Ghana, Ukraine, Russia, China, Saint Lucia, Cuba, India and South Africa.

IMPACT STORIES

Kingdom Mobilization, through its GPS Life Journey curriculum and personal coaching, has helped countless people discover and engage in God's purposes for their lives. As a result, thousands have received practical provision and have come to Christ. Here is what GPS graduates have to say in their own words.

BELINDA JENKINS HAD A "MY GOD MOMENT"

"Through taking the GPS Life Journey, I understood that God was calling me to minister to teens who were having a tough childhood like I did. So wouldn't it be just like God to supernaturally place a hurting teen in my path on the same day when I had just identified what my mission is.

That evening I attended the middle school services at church - as I teach social studies to 8th grade girls. I was introduced to Bri, an 8th grade girl who was obviously struggling. When she abruptly left the worship service about halfway through, I went out to check on her. In our conversation she shared with me that she was bulimic and also that she struggled with cutting. She professed to be a baby Christian and said she was "trying to learn more about God."

For the next 30 minutes I shared with her how I had once been a hurting teen and how God had used the adults at my church to be a lifeline to me.

We talked and prayed together and I encouraged her to continue to come to church and to work hard to make wise choices. I have seen her since then and we have talked about how she is doing. Because of my GPS Life Journey training I was able to clearly share with her exactly what I know my mission to be and that she was it!"

WE HELP YOU DISCOVER THE "REAL THING" THAT GOD WANTS YOU TO DO

"I am so grateful for Kingdom Mobilization's coaching in helping to discover my real purpose. The Agunda Foster Home in Nairobi, Kenya is now a little more than one year old. We have accomplished a lot in serving the orphans of our community. Thank you Kingdom Mobilization for helping me find and fulfill that purpose God had for me. This has been the most satisfying year of my life."

Hilary Agunda, Founder and Director of the Agunda Foster Home

GOD IS AT WORK WORLD-WIDE

AN INTERVIEW WITH KINGDOM MOBILIZATION'S GLOBAL DIRECTOR DOUG HODGE

George Gundlach, Kingdom Mobilization's Managing Director recently interviewed Global Director, Doug Hodge. They talked about how God is using the GPS Life Journey to impact the nations.

George: Did anything happen this year that you would never have imagined a year ago?

Doug: Yes, in February I was conducting a GPS Blitz in Washington, D.C. and one person in the group was a potential GPS Facilitator/Country Director who wanted to take the curriculum to China. I am presently training her to be a Certified Facilitator for that country. Right now we plan to hold our first GPS sessions in Beijing in March 2016. I will be on the ground to take her through the first two sessions. She has already made arrangements with a translator who is a believer and is translating GPS into Chinese.

George: I know you have been working in and around Russia for the last few years. What can you share about progress there?

Doug: GPS is already being utilized by several rehab facilities near Moscow. I will be heading to Ukraine in late October with a pastor of a Russian church located in Southwest Florida. Currently we have one church with 15 leaders to go through GPS in Kiev. We will take some of that group through Certified Facilitator Training so they can continue to help many more discover God's purposes for their lives. We will follow that with meetings in a neighboring city with city officials and university officials to discuss possibilities of bringing GPS to that city. We will also be training two Russians from Moscow. We will take them through Facilitator Training so they will be able to take the GPS Life Journey to the Moscow region.

George: You have had a major focus on Africa in recent years. How are things going there?

Doug: Our biggest growth in Africa has been in Nigeria. I will be there with our Nigeria Country Director, Ken Eze, before the end of the year. We will also be reaching out to pastors in Ghana who have shown interest. We will be training about 25 individuals there. After that we will do training in southern Nigeria with a leader named Pastor George and his group of 25 pastors. Hundreds have completed the GPS curriculum in Nigeria and are engaged in significant service in their communities.

George: As you look ahead to 2016 what further expansion are you anticipating?

Doug: In addition to strengthening our many world-wide connections, I am looking at a potential trip to India in early February to establish a new connection there with an expat in Northern India. I am hoping that that person can serve as our Country Director there. Also, our Houston Area Director, Jim Lieto, will be taking the GPS curriculum to Cuba as it is now translated into Spanish. I am sure God has a lot more on the agenda for 2016 that He will reveal in due time.
